Portfolio: ayoubdk1.github.io/portfolio-AD | **GitHub:** github.com/ayoubdk1 | **LinkedIn:** linkedin.com/in/dakhli-ayoub-a68aa23b2

PROFILE

4th-Year FinTech Engineering Student at ESPRIT building at the intersection of financial architecture, interactive web applications, and intelligent automation. Experienced in shipping end-to-end platforms—from responsive React/TypeScript dashboards and n8n automations to FastAPI/Java microservices, ML-driven risk engines, and Dockerized cloud infrastructure. Designing scalable financial workflows and real-time AML engines by integrating artificial intelligence with robust microservices.

EDUCATION

Engineering Degree in Computer Science (FinTech Engineering) — **2022 – 2028 (Expected)**

ESPRIT – Private Higher School of Engineering and Technologies, Tunis

TECHNICAL SKILLS

Frontend:	React, Next.js, TypeScript, Tailwind
Backend:	Python, FastAPI, Symfony, Java
Databases:	PostgreSQL, MySQL
Infrastructure:	Docker, Linux, VMware
Engineering:	REST APIs, OOP, MVC, Git
AI & Automation:	n8n, Gemini AI

PROJECTS

AI-Driven Financial Workflow Automator — github.com/ayoubdk1/AI-Driven-Financial-Workflow-

Technologies: Next.js, n8n, MySQL, Gemini AI, Sentry, Tailwind — LinkedIn Post: lnkd.in/p/eGMUVMR4

- An event-driven ETL pipeline that ingests unstructured financial documents and extracts structured JSON data using Gemini AI.
- Features a human-in-the-loop approval dashboard with enterprise-grade observability and error tracking via Sentry.

Projet Intégré – Infrastructure Systèmes & Réseaux

Technologies: GNS3, Linux, VMware, MySQL, Apache, NFS, Grafana, Prometheus, Shell

- Designed and deployed a distributed network infrastructure combining physical equipment, virtualization, and system services.
- Implemented static and dynamic routing, integrating web, NFS, monitoring (Prometheus & Grafana), and database services in a secured virtualized environment.

Khademni – Service Matching Platform — github.com/rg-esprit/5ademni.tn

Technologies: Symfony, PHP, MySQL, JavaScript, HTML/CSS, Git

- Developed a full-stack web platform connecting users with service providers, featuring task management and user collaboration.
- Designed backend architecture using Symfony (PHP) and MySQL within an Agile team workflow.

CERTIFICATIONS

- **CCNA: Introduction to Networks** — Cisco Networking Academy — **July 2026**
- **Networking Basics** — Cisco Networking Academy — **July 2026**
- **Getting Started with Cisco Packet Tracer** — Cisco Networking Academy — **November 2025**
- **Introduction to Cybersecurity** — Cisco Networking Academy — **April 2025**

LANGUAGES & INTERESTS

Languages:	Arabic (Native), French (Intermediate), English (Intermediate – Technical Proficiency)
Interests:	FinTech & AI Automation, Open-Source Projects, Running & Cinematography
